DUST FREE MINI FLUSHPLATE

Mini-Flushplate

The Mini-Flushplate, with its multiple interchangeable abrasive heads, is one of the most versatile tool systems available today. Employing the 3M Roto Peen hub, the Mini-Flushplate performs like a hand-held controlled shot blast machine capable of achieving SSPC SP11 cleanliness and is NAVSEA approved. The hammer hub performs like a high speed needlegun. The cutter hub is the most aggressive and is capable of removing non-skid and even scarifying concrete.

Also Available In Electric

Weight:	
Air.....	7.0 lbs
Electric.....	8.0 lbs
Speed:	
Air.....	3,200 rpm
Electric.....	1,100 - 3,600 rpm
Power:	
Air.....	90 psi @ 18 cfm
Electric.....	115 volt / 6.5 amps
Cleaning Swath.....	2.25 inches
	<i>Cleans to within 3/4" of vertical surface</i>
Productivity.....	25 to 150 sq.ft. per hour

Rotary Scarifiers

Desco's Mini-Flushplate and FX Flushplate systems were designed as an innovative solution for applications previously requiring multiple tools. The Desco Flushplate enables the operator to make up a number of tools by simply changing out the abrasive hub. Whether removing rust and corrosion, heavy coatings or providing a mechanical shot blast profile, the Desco Flushplate Systems are capable of tackling all these applications with a simple head change. Desco Flushplate Systems also include engineering controls that enable safe use in the most hazardous environments, including lead abatement and even radioactive decontamination.
